- Since 1998, Millennium Logistics Management has been providing Specialized Logistics to our customers.
- We are unique in our approach providing solutions to the problems our clients have in the supply chain.
- Why choose Millennium over the competition?
√ Because you want it done right, on schedule and within budget!!

Skills:

- As a fully licensed and insured freight forwarder and transportation broker we possess many resources. Carriers, warehouses and last mile white glove delivery agents.
- The markets we serve are numerous. We are flexible and that enables us to customize our services to meet the clients needs.
- Store Fixture Roll-out Management.
- Specialized transportation: High Value Products.
- Expedited transportation.
- Inbound freight management.
- Last Mile Delivery services that include assembly and installation.

About us:

In 1998 Millennium Logistics spun off from one of the most successful van line agents in the country that specialized in transporting computers, exhibits, store fixtures and other high valued products.

Experienced personnel from the various transportation modes, common carrier, truckload, airfreight and parcels.

Member of Council of Supply Chain Management Professionals since 2000.

Member of The Transportation and Logistics Council since 2008.

Experience:

White Glove Distribution Services

- Millennium Logistics manages the “line haul” and the “on the day delivery” for **Fortune 500** companies. Millennium is a single conduit coordinating the timely delivery with the installation team to avoid any down time to their customer. Millennium is responsible for the transportation of LTL shipments to our last mile delivery agents for the appointed delivery. Millennium provides in transit visibility for each shipment.
- Millennium Logistics provides reverse logistics for items that need special packaging and handling to be refurbished as well as end of life equipment. To save freight costs we use a combination of van lines and common carrier.
- For some clients, Millennium manages mini field return parts facilities in 6 markets. This effort is to reduce the carbon footprint emissions on the return and recycling of parts that are no longer usable. The facilities receive the used parts and scan them to a proprietary software program that will instruct the warehouse to put into recycle or return bins. This step eliminates the need to ship back parts that will be scrapped, thereby reducing the amount of vehicles needed to return to the main plant.
- Millennium Logistics provides a wide variety of last mile **White Glove Services**. Example: For Demo equipment, removing the product from the crates and packaging, to hold at the local terminal. When the demo period has ended we return, repack the product and move to the next demo site.
- Millennium Logistics provides services to Medical Industry suppliers by delivering and performing light assembly of furniture or electronics to the medical facility.

Specialized Logistic Services and our Shipping Help Desk.

- Millennium Logistics manages “milk runs” that provide improved visibility, reliability, and eliminates damage caused by cross-dock handling.
- Millennium Logistics “Shipping Help Desk” is a widely used resource for many clients to get quotes, set up expedited / dedicated trucks, temporary regional warehousing as well as reverse logistics. Try it . Contact us at sales@shippinghelpdesk.com.
- Millennium Logistics can relocate your server farms and offices; across town or across the country.
- Millennium Logistics will quote the services you request and provide pricing options to save you money.

Past projects provided for clients:

- VMI saves our clients money. Can a Vendor Managed Inventory program work for you?
- Managed an inventory program of parts from a supplier in Mexicali, to our warehouse in Columbia, SC to a Kan Ban replenishment in their SC manufacturing plant. Our technology (MINTS) enabled all related parties to have total visibility to parts status from the time they were shipped until they delivered.
- Managed inbound vendor programs that created JIT deliveries and provided purchasing with full visibility to remove the potential of excess product or early shipments which would, negatively impact the inventory counts for monthly accounting.
- Managed hundreds of store fixture / kiosk rollouts. All rollouts having different requirements such as before stores/malls open or after close, inside department floor deliveries, unskidding and debris removal.
- Designed and built custom carts for a regional swap out of new and old POS terminals.
